

DATA PROTECTION OFFICER AS A SERVICE

01

DATA PROTECTION OFFICER

Your assigned DPO will guide and represent your organisation in all matters pertaining to GDPR compliance.

02

THE DATA SUBJECT

Your DPO can be likened to a 'consumer advocate'. The role requires that legal rights of the data subject are responded to appropriately.

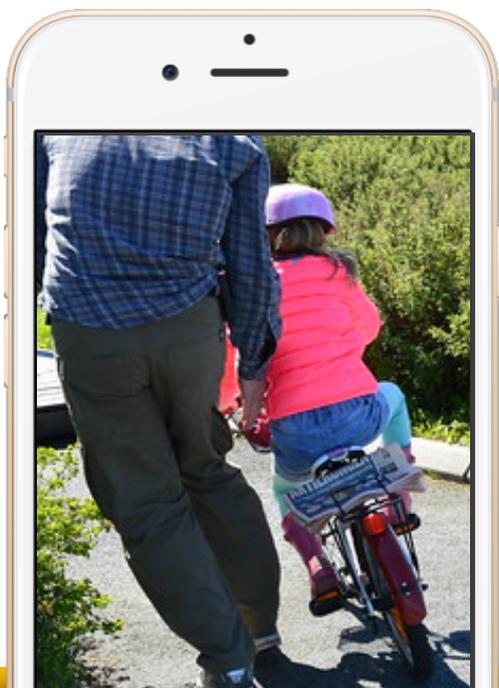

03

GDPR COMPLIANCE

Your DPO will guide your organisation to GDPR compliance which potentially requires liaison with every business function which is collecting/processing personal data -which is probably ALL!

Onsite | Remote Get the best of both worlds

The role of the Data Protection Officer is to assess and act upon privacy risks standing in the shoes of the data subject. This can be a conflict role, i.e. when balancing corp and brand risk against privacy risk, requiring competencies beyond the obvious skillset. Privasee's DPO as a Service provides a low-cost, controllable way to outsource these competencies from a company which is niched in this space.

COMPONENT	UNIT	PRICE
Pre-requisite is a GDPR maturity audit	40 hours /	5 840 €
Pre-requisite is that employees have completed GDPR training.***	Per employee 20-30 min training	30 €
DPO*	Hour**	146 €

- * Negotiable if an audit has recently been done.
- * Minimum number of hours depends on the size of the organisation. Less than 500 employees requires 40 hours (5 days) per year.

- ** If more than 40 hours in a month is ordered the rate drops by 20%.
- *** Does not need to be purchased from Privasee. As long it is Scorm-compliant, evidenced and content is understood by the employee, this is great!

Personal data is our business. Let us help you make it yours!

OUR ROOTS

Privasee was born in June 2015. We saw that six words in the GDPR “data protection by design by default” required an approach which extended the reach of privacy compliance out of the legal function into every business function.

Privasee’s vision is
“to make privacy compliance accessible to all”.

OUR FOUNDER

Karen Lawrence Öqvist believing a pragmatic approach was needed, developed tools and techniques to make GDPR compliance affordable for every organisation.
